Notice Concerning the Theft of Electric Cables
from Asset Under Management (Follow-up Report)

In May 2026, Canadian Solar Infrastructure Fund, Inc. (hereinafter referred to as “CSIF”) announced that certain electrical cables at the CS Kannami-cho Power Plant had been stolen or otherwise damaged, resulting in a partial suspension of power generation at the plant.

CSIF hereby announces that the restoration work at the plant has been completed as outlined below:

1. The restoration work including replacement of the stolen copper cables with aluminum cables was fully completed on September 16, 2026. The plant resumed its full operation from the morning of September 17, 2027.
2. The amount for the restoration expense was approximately JPY 27 million. Since CSIF is receiving from the lessee an amount equivalent to 70% of the forecasted monthly power generation as a basic rent, the impact of the suspension of power generation on the whole rent income of CSIF is limited. As a result, there will be no revision to the forecasts for the fiscal period ending December 2026 (19th period).

End
