SKY Perfect JSAT announces agreement as an authorized reseller of Amazon Leo to bring high-speed satellite connectivity to enterprise and public sector customers in Japan

SKY Perfect JSAT Corporation (Head Office: Minato-ku, Tokyo; Representative Director, President & Chief Executive Officer: Eiichi Yonekura; “SKY Perfect JSAT”) hereby announces an agreement for Amazon Leo, Amazon's low Earth orbit (LEO) satellite network. Under the agreement, SKY Perfect JSAT will serve as an authorized reseller, bringing high-performance satellite connectivity services to enterprise and public sector customers throughout Japan, as follows.

SKY Perfect JSAT announces agreement as an authorized reseller of Amazon Leo to bring high-speed satellite connectivity to enterprise and public sector customers in Japan

As an authorized reseller of Amazon Leo, SKY Perfect JSAT will offer low Earth orbit satellite connectivity powered by Amazon Leo to enterprise and public sector customers, supporting resilient communications, remote connectivity, disaster response, and potential secure network options.

Tokyo, Japan — [June 12, 2026] — SKY Perfect JSAT Corporation (“SKY Perfect JSAT”), has announced an agreement for Amazon Leo, Amazon's low Earth orbit (LEO) satellite network. Under the agreement, SKY Perfect JSAT will serve as an authorized reseller, bringing high-performance satellite connectivity services to enterprise and public sector customers throughout Japan.

The agreement combines Amazon's next-generation satellite technology with SKY Perfect JSAT's extensive experience in satellite communications, long-standing relationships with public sector and critical infrastructure customer, and managed service capabilities, enabling reliable connectivity for customers operating in remote, disaster-prone, and other mission-critical environments across Japan.

Amazon Leo is Amazon's LEO satellite network, designed to provide high-speed, low-latency broadband connectivity. Powered by a constellation of thousands of satellites, Amazon Leo will serve enterprise and public sector customers. Amazon Leo is designed to meet the demanding performance, reliability, and security requirements of business customers worldwide.

Serving key industries across Japan

SKY Perfect JSAT plans to offer Amazon Leo as part of its satellite communications portfolio for enterprise and public sector customers across Japan. These customers include government agencies, municipalities, telecommunications operators, critical infrastructure providers, and media companies.

In these markets, customer needs are expanding beyond public connectivity to more secure and reliable communications platforms that combine resilient network design, cloud integration, managed operations, and potential secure network options such as private connectivity.

Going forward, SKY Perfect JSAT will conduct technical evaluations and establish the necessary sales and operational frameworks to support the deployment of Amazon Leo services in Japan. The company will also continue to explore specific service offerings tailored to customer needs.
