Notice Concerning Partial Addition to the Q3 FY2025 (63rd Term) Financial Results

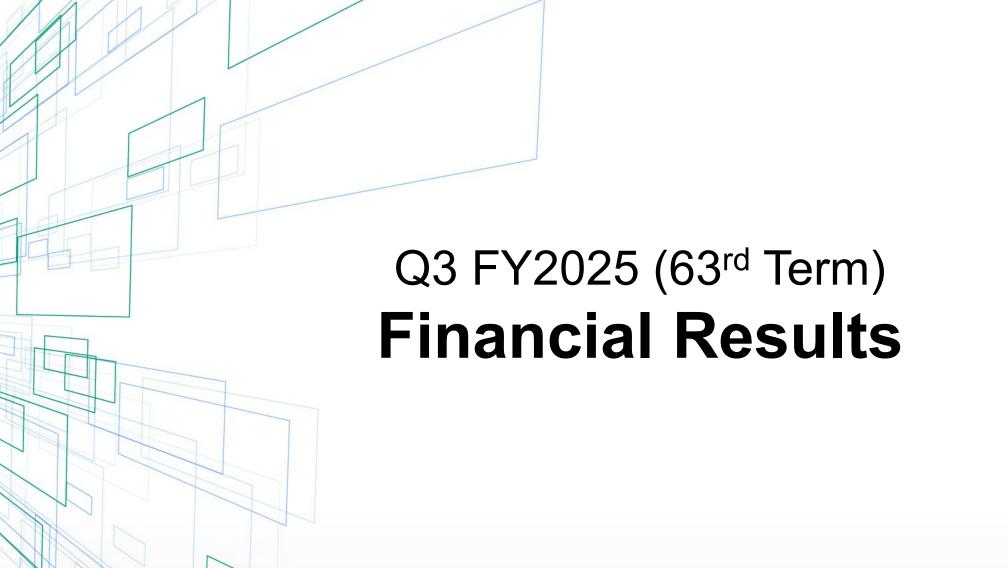

CTI Engineering Co., Ltd. (the "Company") hereby announce that there is a matter to be added in a part of the content of the English version of the "Q3 FY2025 (63rd Term) Financial Results (including supplementary data)" announced on November 12, 2025, as follows:

1. Reason for the Addition

The supplementary material was not attached to the English version of the "Q3 FY2025 (63rd Term) Financial Results (Including supplementary data)" and we have added and corrected them.

2. Details of the Addition

The supplementary material has been added to the end of the main text.

Tokyo Stock Exchange / Code number: 9621

CTI Engineering Co., Ltd.

12 November 2025

- Q3 FY2025 (63rd Term) Financial Results

CONTENTS

• Q3 FY2025 (63rd Term) Financial Results

Appendix

CONTENTS

Q3 FY2025(63rd Term)

- Orders received are strong, increased by 15.2% YoY
- Sales are on track, at the same level as the same period of last year
- **Operating income** decreased by 12.5% YoY

 Affected by increased SG&A expenses and deteriorated cost of sales in some subsidiaries
- Net Income Attributable to Owners of the Parent decreased by 18.1% YoY Affected by extraordinary losses and decrease in Operating Income announced in Q2

Full-year forecast

■ Full-year forecast remain unchanged as profitability is expected to improve Improved utilisation rate due to increased Orders Received Controlling SG&A expenses through strict expense management

Shareholder returns

Acquisition 1.5 billion (upper limit) yen of Own Shares

To enhance capital efficiency based on progress in growth investments, performance and financial condition (Acquisition period: From 13 November 2025 to 30 April 2026)

Q3 FY2025 (63rd Term)-Financial Highlight (Consolidated)

Orders Received

JPY **88,964** million

FY2024 (62nd) JPY 77,228 million %YoY +15.2%

Sales

JPY **73,270** million

FY2024 (62nd) JPY **72**,197 million %YoY +1.5%

Operating Income

JPY **6,489** million

FY2024 (62nd) JPY **7,419** million %YoY -12.5%

Net Income Attributable to Owners of the Parent

JPY **4,311** million

FY2024 (62nd) JPY **5,266** million %YoY -18.1 %

Orders Received Orders Received increased by 15.2% YoY

Trend unchanged from Q2, continued strong performance

Sales

Sales are at the same level as the same period of last year

Slightly higher than the previous year due to steady progress in Orders Received

Operating Income

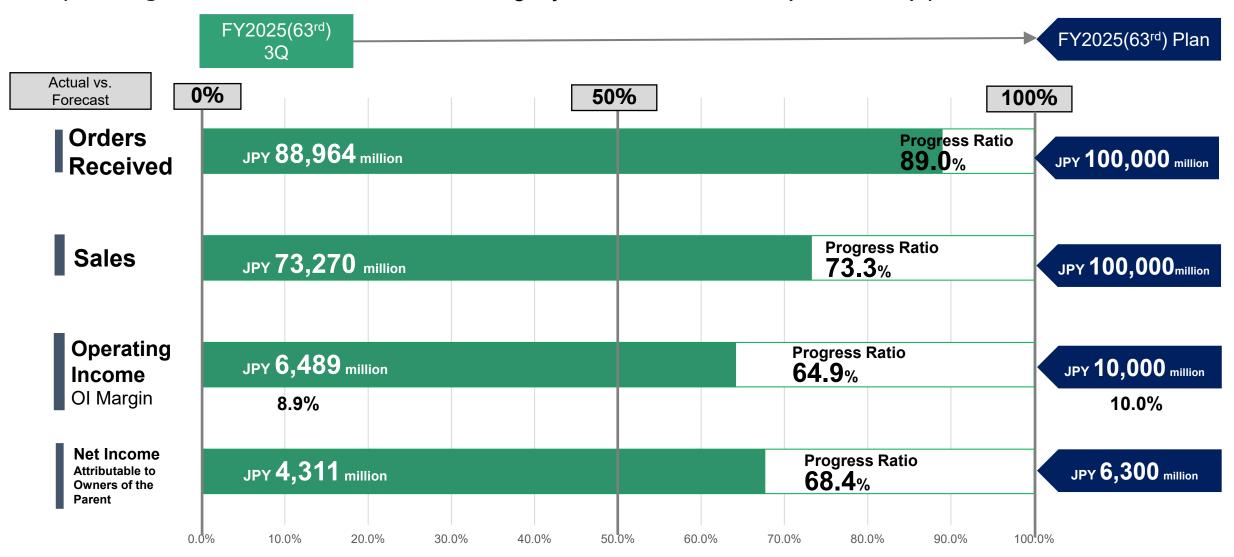

Operating income decreased by 12.5% YoY

Affected by increased SG&A expenses and deteriorated cost of sales in some subsidiaries

Q3 FY2025 (63rd Term) -Financial Highlight (Actual vs. Forecast)

Orders Received and Sales are progressing on track against the FY2025(63rd Term) plan Operating Income and Net Income are slightly behind the FY2025(63rd Term) plan

Q3 FY2025 (63rd Term) - Profit and Loss Statement (Consolidated)

(JPY million)

| | Q3 FY2024 | Q3 I | FY2025 (63 rd | Term) | | 63 rd Term) Plan) |
|--|-------------------------|--------|--------------------------|--------------------|---------|---------------------------------|
| | (62 nd Term) | | Change(¥) (YoY) | Change(%) (YoY) | | Achievement vs. Plan(%) |
| Orders Received | 77,228 | 88,964 | +11,735 | +15.2% | 100,000 | 89.0% |
| Sales | 72,197 | 73,270 | +1,072 | +1.5% | 100,000 | 73.3% |
| Operating Income | 7,419 | 6,489 | -929 | -12.5% | 10,000 | 64.9% |

Role of the Consulting Engineers

Infrastructure developments are carried out mainly by three parties: (1) National and Local Governments, (2) Consulting Engineers, and (3) Construction Companies.

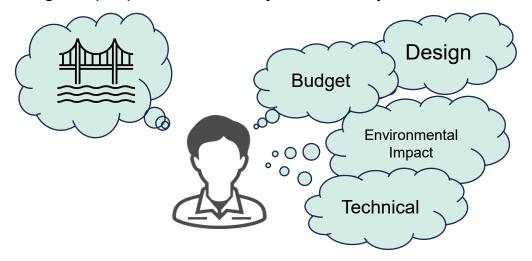

For "National and Local Governments" that decide projects and make plans,

We "Consulting Engineers" provide specific surveys, plans, designs, etc. as a partner.

Specialists about Infrastructure

For example, let us imagine, "We'll build a bridge", we should consider about the type of bridge, the design, its length and width, budget, the geology, environment on the other side of the river, the response to a disaster, and the any other aspect about bridge.

Consulting Engineers are professionals in social infrastructure development who coordinate infrastructure projects from start to finish, ensuring that people can live safety and securely.

People Infrastructure development Client (national or local government, etc.) Consulting engineer Provide research, planning, and People Infrastructure development Construction company Perform construction work

design-related consulting

Business Process of Consulting Engineers

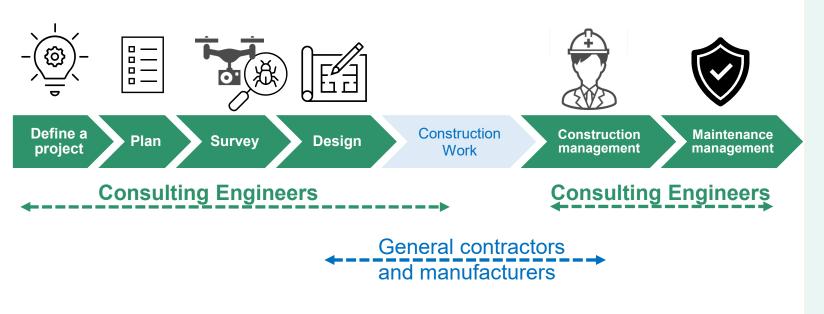

The role of consulting engineers is to provide consulting services such as surveys, planning, and design, etc. as a partner to national and local governments that make project decisions and planning.

We undertake almost all the workflow, but in accordance with the "Principle of Separation of Design and Construction", the construction company is responsible for the construction part.

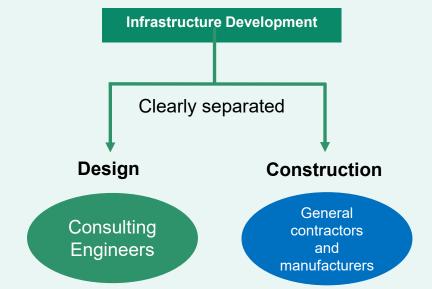

Workflow of infrastructure development

Consulting engineers are involved from the initial planning stage by national and local governments and act as advisors throughout all stages, including planning, design, construction management, and maintenance after completion.

Principle of Separation of Design and Construction

During rapid economic growth period in Japan after WW2, the Ministry of Construction (now the Ministry of Land, Infrastructure, Transport and Tourism) clarified the principle of separation of design and construction.

Basic Workflow of Consultant Engineers

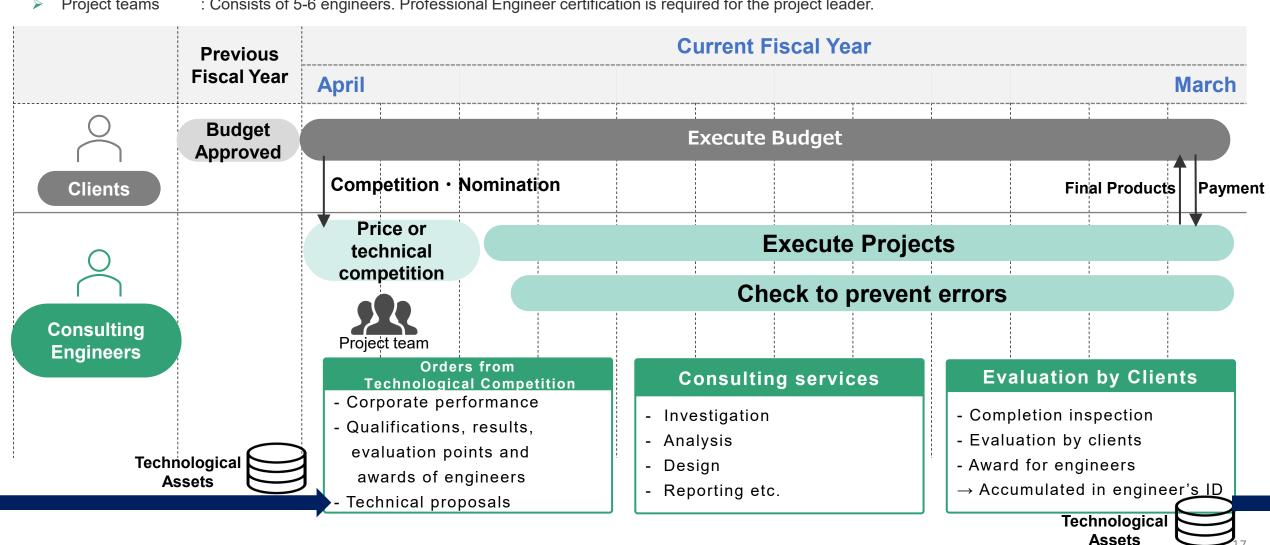

Project size : Mostly tens of millions of yen. In recent years, the number of large-scale projects is increasing by several hundred million.

Number of projects: Thousands per year

: Basically 1 year, but multi-year large-scale projects are increasing in recent years. Project period

The ends of projects period tends to concentrate at the end of the fiscal year (March)

Project teams : Consists of 5-6 engineers. Professional Engineer certification is required for the project leader.

(Reference Data) Quarterly Sales Amounts and Operating Income (Consolidated)

Since CTI Engineering Group has a lot of public projects, work progress tends to concentrate at the end of fiscal year, resulting in a tendency for sales and income to be clustered towards 1Q. (after the adoption of Accounting Standard of Revenue Recognition in 2022)

The History of CTI Engineering Co., Ltd.

Our Founding: amidst Japan's defeat in WWII The history of the Construction Technology Institute (the predecessor of CTI Engineering Co., Ltd.) begins in December 1944, as Japan headed toward its defeat in World War II.

The board of directors of the Japan Civil Engineering and Construction Control Association approved a proposal to establish an incorporated foundation on August 1, 1945, for the purpose of developing construction equipment that could compete with those of the United States in airfield construction.

August 1, 1945: The Construction Technique Institute is founded

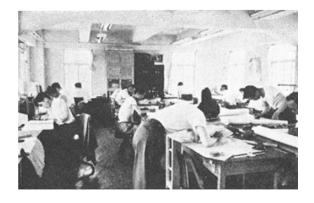

Office at the time of establishment

Period of
Growth:
entered the field of
water engineering

From 1950 onward, with the Korean War in full swing, the number of contracts for engineering consulting services multiplied year after year. The Institute quickly and accurately grasped Japan's agenda for post-war reconstruction and focused on one area: hydropower generation and related dam construction.

This has led to our strength in the water sector that continues to this day.

April 4, 1963: Construction Technology Institute Co., Ltd. is incorporated

Transformation in the face of changing times

In 1964, Japan's River Act was revised, requiring a basic plan for the implementation of construction work to be formulated for each river system. To keep up with the new requirements, we introduced electronic calculators - which were expensive at the time—before any of our competitors. This was a decisive factor in our development in the field of river planning.

We had grown steadily, registered its shares with the Japan Securities Dealers Association as over-the-counter stock in June 1994. Then we listed its shares on the Second Section of the Tokyo Stock Exchange in October 1996, and listed on the First Section of the Tokyo Stock Exchange in June 1999.

Professional Engineers with Advanced Technical Skills

Since the founding of the Construction Technology Institute (our predecessor) in 1945, we have been a leading company in the industry for many years.

We are a comprehensive consulting engineers that competes for the top position in sales in domestic market on the strength of our accumulated technologies developed over 80 years since our founding.

As we receive 90% of orders from the public sector, including national and local government, we have a stable profit structure.

Leveraging our experiences in river infrastructure development, we have been contributing to the comprehensive management of entire river basins - including the drafting of disaster prevention and mitigation measures for floods, droughts, and other disasters, as well as the conservation and improvement of the water environment and water cycle.

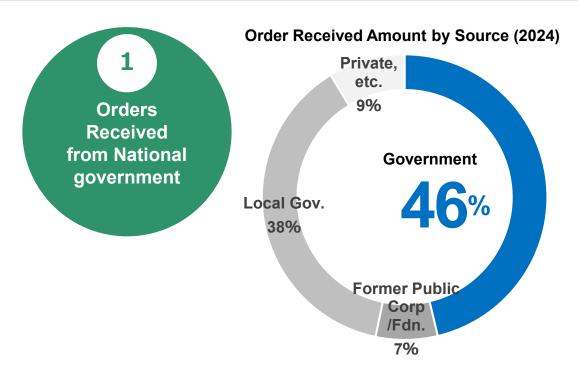

We are a group of consulting engineers with more than 1,600 licensed **Professional Engineers (P.E.Jp).**

We believe that human resources are our greatest management capital, and we actively invest in human resource development such as the Professional Engineer Qualification Support Program and graduate schools for working adults.

25

Our Strengths

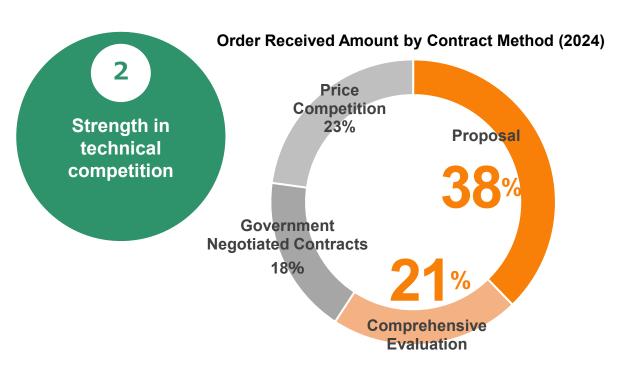

Half of all orders received are from the national government.

While national projects are stable and highly profitable, it requires advanced technology.

As we receive a lot of orders from the government, we ensure profitability and build up a track record of engineers through the implementation of projects, which will lead to orders in the next year.

This cycle has resulted in our technological superiority.

In the future, we will maintain MLIT sales while expanding sales to prefectures, municipalities, and primary government agencies, aiming to expand our profit and transform our customer structure into well-balanced.

Orders received under "Proposal" and "Comprehensive Evaluation", in which technical capabilities are evaluated, accounted for 60% of total orders received, indicating the high level of our technical competitiveness

Proposal

: Competition based on technical proposal capability only

Comprehensive Evaluation

: Competition based on both technical proposal capability and price

Price Competition

: Competition based on price only

Government Negotiated Contracts

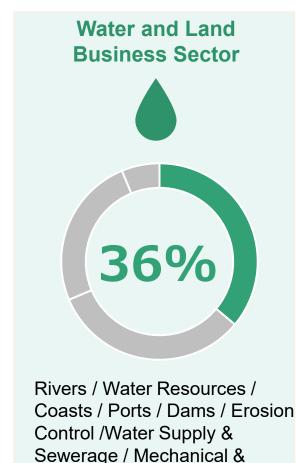

: Specific contractor is selected without a competitive bidding process due to the client's circumstances

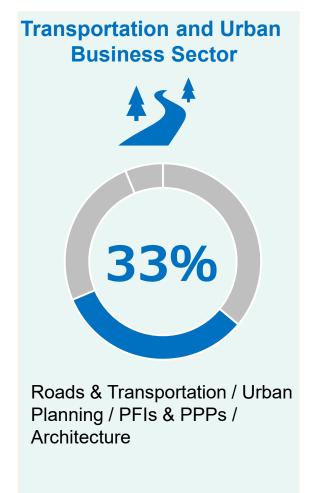

Business fields of Domestic Segment

Consolidated Group Company (Overseas)

We are expanding globally with two subsidiaries, Waterman and CTI International

62nd Term (2024) Composition of Overseas Segment Sales

Waterman Group Plc

History

Joined CTI Group in June 2017

Business Outline

Private sector

→ Structure, Building service, Civil Engineering

Public sector

Civil Engineering, Secondment of engineers

Business Area

United Kingdom, Ireland, Australia

62nd Term (2024) Composition of Overseas Segment Sales

CTI Engineering International

History

March 1999, spun off as wholly owned subsidiary from our overseas business division

Business Outline

Consulting engineer business mainly through ODA in semi-developed and developing countries

Major Business Partners

Japan International Cooperation Agency (JICA) World Bank, Asian Development Bank, other governments, etc.

Business Area

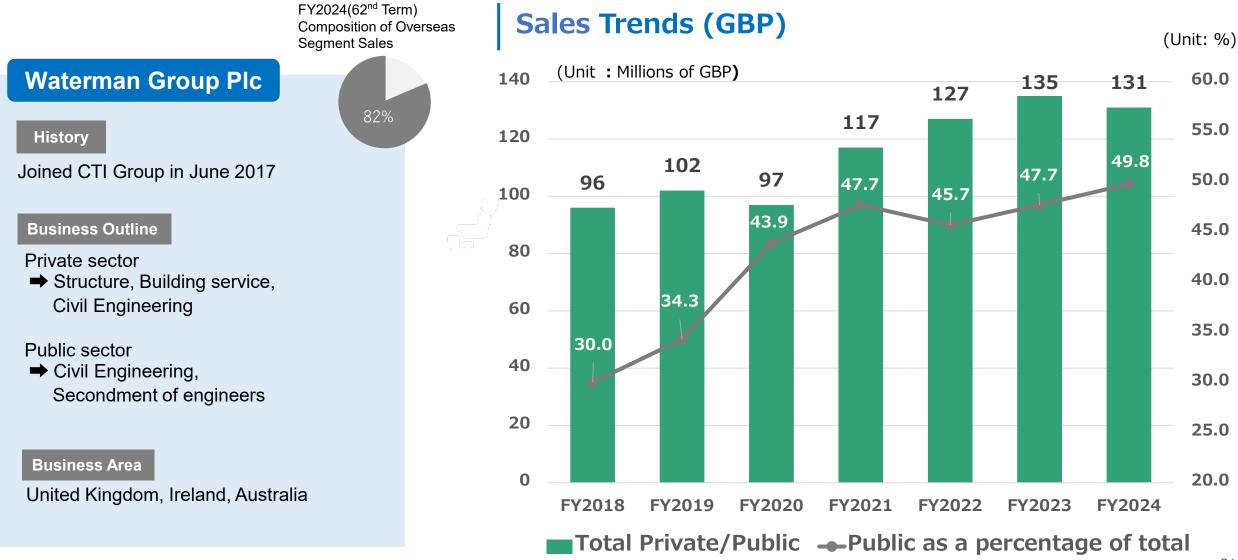

Based in Japan, the Philippines, and Myanmar Business target area: Asia, Africa, Middle East, South America, etc.

CTI Engineering International Co., Ltd.

Sales of Waterman Group Plc after the Acquisition

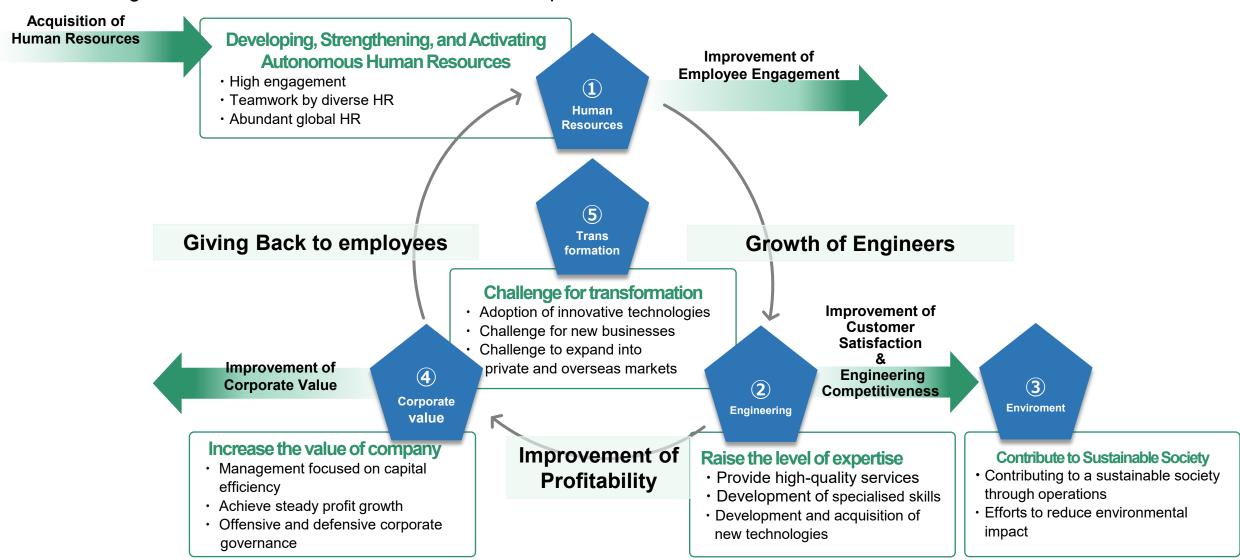

- Sales of Waterman Group Plc have progressed steadily since 2017
- After our acquisition, public sector Sales have increased

Mid-Term Management Plan 2027 Appendix : Five Key Factors to Express "How we should be"

Based on the five key factors that express ideal state of CTI Engineering Group, the measures to be implemented in the Mid-Term Management Plan 2027 are consolidated into two pillars.

Mid-Term Management Plan 2027 Appendix : Rationale for Numerical Targets

Important management figures in 2027

| Sales | Continue to strengthen our workforce at an annual growth rate of around 5% and aim for net sales of JPY 110 billion or more (achieve SPRONG2030, our mid- to long-term vision, ahead of schedule) |
|---------------------|--|
| Operating income | Aiming for sustainable profit growth over mid- to long-term and operating income of JPY 12 billion or more |
| ROE | Secure at least 12% ROE by business development, improvement of productivity and appropriate returning profits to shareholders |
| Labour productivity | Increase labour productivity by 10% or more from the current level by improving efficiency through promotion of DX and upgrading project management. (10% improvement in internal output per hour) |

Key points in setting the plan

Profit Plan

- Continue to strengthen workforce and raise wages
- Improve or maintain gross margins through DX and work efficiency
- Reduce operational reworks and errors by upgrading PM. Improve performance quality and reduce working hours through the advancement of PM.
- Decrease SG&A Expenses by DX and improving efficiency

Orders Received Plan

- Achieve a balanced customer structure with local governments and the private sector while keeping orders from the Ministry of Land, Infrastructure, Transport and Tourism
- Achieve targets through sustainable growth in core business areas, expansion of growth areas, and external growth such as M&A

Financial Plan

 Improve ROE and EPS by combining steady growth in operating income, flexible shareholder returns such as dividends, and external growth such as M&A

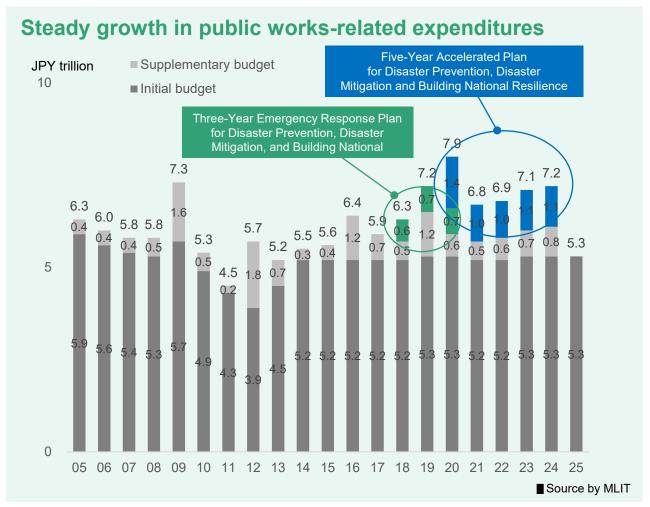

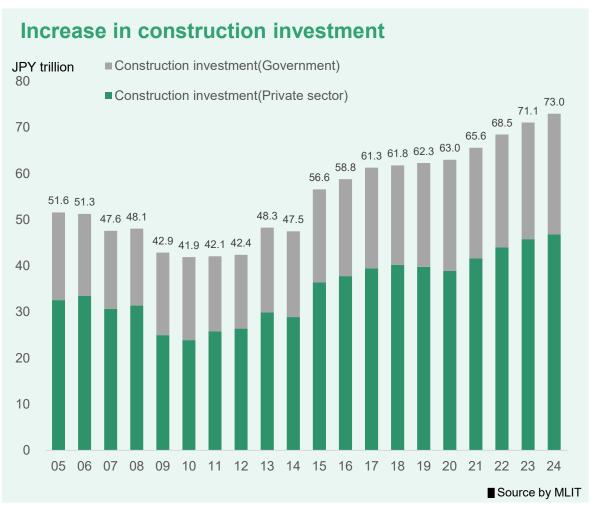

The market for consulting engineering business, our core business, is strongly influenced by government budget allocations and construction investment.

Public works expenditures (Ministry of Land, Infrastructure, Transport and Tourism) have remained steady due to the "Five-Year Acceleration Plan for Disaster Prevention, Disaster Mitigation and Building National Resilience" through 2025.

Overall construction investment (public and private) has been increasing continuously since 2014.

Construction investment by the government and the private sector is expected to stabilise to a certain extent in the future, and the potential market is also large due to the state of undeveloped infrastructure.

(Reference Data) External Environment (Disaster prevention and mitigation, national resilience policy)

- Government approved the "The First Medium-Term National Resilience Implementation Plan" in June 2025
- The plan covers the five-year period from FY2026 to FY2030 with an estimated total budget of approximately JPY 20 trillion
 * JPY 15.6 trillion secured for the previous five-year accelerated measures through by FY2025

Background:

- Assumed damage from Nankai Trough megathrust earthquake
- Increasing severity and frequency of heavy rain disasters due to climate change
- Road sinkhole accidents caused by aging infrastructure

Major Plans:

- **Disaster prevention infrastructure:** Enhancement/utilisation of flood risk information, basin flood control measures
- Lifeline resilience: Measures against the aging road/water facilities, reinforce seismic resilience of bridges and other structures
- **Digital & new technology:** Labour-saving measures at construction sites utilising automated construction technology
- **Public-private partnership:** Seismic reinforcement of housing/buildings, measures for disaster-resilient urban development
- Strengthening regional disaster: Improvement of evacuation shelter environments, enhancement of disaster equipments

Project Scale:

- Disaster prevention infrastructure: 5.8 trillion yen

- Lifeline resilience: 10.6 trillion yen

- Digital & new technology: 0.3 trillion yen

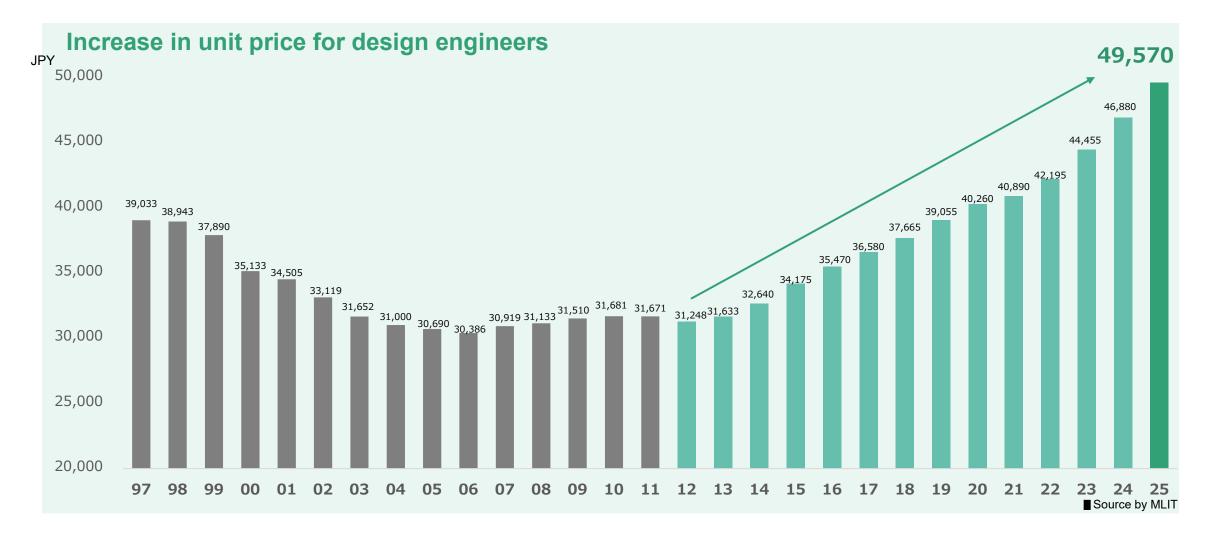

- Public-private partnership: 1.8 trillion yen

- Regional disaster preparedness: 1.8 trillion yen

Source: First Medium-Term Plan for the Implementation of National Land Toughening Measures, Cabinet Secretariat

- Unit price for design engineers: A unit price used for the estimation of design outsourcing (design, survey, geology, etc.) ordered by the Ministry of Land, Infrastructure, Transport and Tourism. Set unit prices based on annual salary surveys
- In FY 2025, the average of all job categories was 49,570 yen, up 5.7%

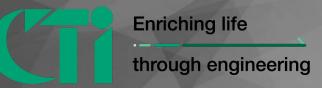

Business Philosophy

We strive to create a safe,

Comfortable and enriching society

Using world-class technology and expertise.

CTI Engineering Co., Ltd. has faced social issues with integrity throughout its history as a pioneering consulting engineer. It has worked to solve a variety of infrastructure development issues by constantly improving its engineering capabilities.

As technological innovation accelerates, we will serve as a group of professionals who will ambitiously take on new technologies and always provide the best infrastructure services. We will work tirelessly to create a society where people can live safely and securely with an eye on the future.

3Q / 63th term (2025)
