1. Basic Views

Dispensing pharmacy and retail are the key business areas being developed by the AIN Group (the Group). As this business is characterized by responsibilities for people’s health and lifestyles, we recognize it is indispensable to continue the sound and transparent business activities that prioritize compliance.

To achieve this goal, we have adopted the Company with Corporate Auditors to oversee not only important decision-making in the management and the business execution, but also general corporate management.

The Corporate Audit Office which is independent from business management conducts internal audits covering all management activities related to governance processes, risk management and control, and the Group serves to ensure thorough compliance with relevant laws, internal rules and regulations.

In addition to the above, as part of our efforts to enhance corporate governance, we have formed a Compliance Committee for the purpose of establishing, promoting, and embedding compliance system, a Risk Management Committee for realizing comprehensive risk management from a group-wide perspective, and a Sustainability Committee for the purpose of establishing, promoting, and embedding the Group's sustainability management system.

[Reasons for Non-compliance with the Principles of the Corporate Governance Code]

The Company holds shares that are expected to have synergistic effects on business alliances related to our business and maintenance and enhancement of business transactions, and shares that are necessary for maintaining relationships with local communities.

According to its policy, the Company in principle holds and maintains the cross-shareholdings which account for 5% or less of the net assets recorded on the consolidated balance sheet, and if the total amount of shares exceeds such percentage, the Company will promptly consider selling the shares.

In addition, the Company will examine at the Board of Directors whether the purpose of cross-shareholding is appropriate, whether the benefits and risks from each holding cover the Company’s cost of capital, and whether there is any other effective use of funds, and decide whether to continue holding shares or reducing shares by selling them. The Company shall exercise voting rights associated with cross-shareholdings in accordance with the following criteria: “While fully respecting the management policies of the investee company, the Company shall consider and vote on each proposal after comprehensively assessing whether the proposal will contribute to improving the corporate value of the investee company and the Company’s medium- to long-term corporate value. In the event of serious corporate governance concerns, such as operating losses in continuous fiscal years, significant damage to shareholder value due to corporate reorganization or other decisions, or corporate scandal and other concerns, the Company shall vote on each proposal after examining the details with particular scrutiny.”

Explanation

The Company assumes cost of equity of approximately 6% in the estimates using CAPM. On the other hand, in the course of our proactive stakeholder relations activities, we have learned our cost of capital that investors expect through direct interviews, and we recognize that there is a discrepancy with the CAPM estimate. ROE for the fiscal year ended April 2026 is 11.5%, which exceeds the cost of equity based on the CAPM, but profit attributable to owners of parent is subject to certain temporary upward factors. Therefore, in order to continuously expand equity spread relative to the cost of capital required by investors, we are expected to reliably achieve ROE target of 13.5% for the fiscal year ending April 2034 as set forth in our medium- to long-term vision. To achieve these targets, the Company is working to lift the net profit margin (by increasing profitability through efficiency gains and reducing the selling, general & administrative [SG&A] expenses ratio through business expansion) and improve financial leverage (by returning profits to shareholders and using borrowings to invest in growth). In addition, the PBR is 1.3x, and has continuously remained above 1x, which we believe is a certain level of market valuation.

Yes

Content disclosed out of the policy for determining the amount of remuneration or the method to calculate this amount

(Basic Policy)

Directors of the Company are required to work towards improved business performance and sustainable growth while sharing values with our stakeholders so that the Group can fulfill its social role and responsibility by contributing to local healthcare and providing beauty and happiness. The remuneration for Directors of the Company consists of a system comprising monthly fixed remuneration according to roles and responsibilities, bonuses which are performance-linked remuneration that enhance the transparency and objectivity of the remuneration decision process and provide performance incentives, and non-monetary remuneration for recognizing the same perspectives on sustainable growth as shareholders.

However, the remuneration of outside Directors shall consist of a system suitable for the roles and responsibilities of supervising the management of the Company from an independent and objective standpoint.

It should be noted that the Nomination and Remuneration Committee conducts its deliberations based on economic and social conditions, the Company's business performance, as well as objective indicators and advice that has been provided by external research organizations.

(Monthly remuneration decision policy)

Monetary remuneration (that which is neither performance-linked remuneration nor non-monetary remuneration) shall be "basic remuneration" as a fixed monthly amount and shall be determined after comprehensive consideration of position, responsibilities, years in office, balance with employee wages, remuneration levels at companies of a similar scale throughout all industries, and past payment history. Additionally, when outside directors serve as chair or members of the Nomination and Remuneration Committee, they receive an allowance (chair allowance or member allowance) for such roles.

(Bonus decision policy)

Bonuses are paid once per year, with the payment rate determined based on the achievement rate of KPIs (Key Performance Indicators), using consolidated net sales, consolidated operating profit, and ROE for each fiscal year as financial indicators, and CO2 emissions per net sales of ¥100 million and employee engagement score (degree of achievement relative to the all-industry average surveyed by the company commissioned to conduct the survey) as sustainability indicators. Furthermore, the KPIs and the respective evaluation weights thereof shall be reviewed annually by the Nomination and Remuneration Committee, taking into comprehensive consideration factors such as incentives for achieving management targets for each fiscal year based on the assumption of enhancing corporate value over the medium to long term, as well as social trends and trends at other companies.

The KPIs and the respective evaluation weight in relation to bonuses are as shown in the table below.

KPI	Evaluation weight
Financial indicators	
Consolidated net sales compared to budget	10%
Consolidated operating profit compared to budget	30%
Consolidated operating profit year on year	25%
ROE	25%
Sustainability indicators	
CO2 emissions per net sales of ¥100 million (Scope 1 and 2)	5%
Employee engagement score (Degree of achievement relative to the all-industry average surveyed by the company commissioned to conduct the survey)	5%

The achievement rate is calculated by aggregating the results of "actual performance ÷ target × evaluation weight" for each KPI.

The relationship between the achievement rate and the payment rate is as shown in the table below.

Achievement rate	Payment rate
Less than 50%	0%
50% or more, less than 150%	Same as the achievement rate
150% or more	150%

(Non-monetary remuneration decision policy)

Non-monetary remuneration shall be paid by restricted stock (RS), and a standard amount of monetary remuneration claim determined by position and responsibility shall be granted each year up to a total of 50 million yen, with allocation of common stock through in-kind contribution of monetary remuneration claim. The number of shares of the Company's common stock to be allocated as restricted stock remuneration shall be no more than 50,000 shares per year.

In the future, the Company will continue to keep a close eye on requests from its shareholders and other stakeholders, as well as on the remuneration structures of companies of a similar scale throughout all industries, and have the Nomination and Remuneration Committee appropriately examine the ideal form of incentives linked with short-term to medium/long-term performance.

(Remuneration composition ratio)

Taking into consideration the characteristics of the business, business environment, and trends of other companies, the composition ratio of remuneration for directors other than outside directors is designed so that the composition ratio of basic remuneration, bonuses (standard amount), and non-monetary remuneration is approximately 100:50:20. Only basic remuneration will be paid to outside directors.

(Decision method regarding the content of individual remuneration for Directors)

Decision of the specific details for amounts of remuneration for each individual shall be commissioned to the Nomination and Remuneration Committee within the scope of determined parameters by resolution of the Board of Directors after the Nomination and Remuneration Committee prepares and deliberates on a draft of the range of monthly remuneration amount for each position, the content of evaluation based on the achievement of KPIs related to bonuses, as well as the amount of non-monetary remuneration for each position, and submits its

reports to the Board of Directors.

(Matters relating to delegation of decision-making on content of individual remuneration for Directors)

The Board of Directors shall delegate to the Nomination and Remuneration Committee the authority to determine the specific amounts of basic remuneration, performance-linked remuneration, and non-monetary remuneration for each individual Director. The purpose of this delegation is to ensure fairness, transparency, and objectivity in the determination of Director remuneration by delegating authority to the Nomination and Remuneration Committee, which is composed of a majority of independent outside Directors and is chaired by an independent outside Director. The Nomination and Remuneration Committee makes decisions on the details delegated to it within the range of amounts resolved by the Board of Directors following the report of the Nomination and Remuneration Committee.

Supplementary Explanation

By resolution of the Board of Directors dated August 25, 2026, the Company resolved to introduce response policies against large-scale acquisition activities targeting shares of common stock of the Company (the “Response Policies”) in light of the ongoing large-scale buying-up of the Company’s shares by a major shareholder. The purpose of the Response Policies is to ensure that shareholders are provided with sufficient information and time to appropriately determine whether to accept or reject Large-Scale Acquisition Activities, thereby maximizing the Company’s medium- to long-term corporate value and consequently the common interests of shareholders.

Under the Response Policies, a Specific Shareholder Group whose Voting Rights Ratio is 22.24% or more at the time of the introduction of the Response Policies constitutes a Large-Scale Acquirer, and any subsequent acquisition of the Company’s Share Certificates, etc., including the acquisition of even one additional share, may constitute Large-Scale Acquisition Activities. A Large-Scale Acquirer is required to submit a Statement of Purpose in advance and provide information necessary for shareholders’ consideration, while the Board of Directors will secure a period for evaluating and examining the Large-Scale Acquisition Activities.

If the Board of Directors considers that countermeasures should be triggered, it will, in principle, convene a Shareholders’ Will Confirmation Meeting to confirm shareholders’ intentions. If shareholders approve the triggering of countermeasures and the Large-Scale Acquirer does not withdraw the Large-Scale Acquisition Activities, the Company may implement a gratis allotment of Stock Acquisition Rights with discriminatory exercise conditions, acquisition clauses and other terms.

The Company has also established an Independent Committee in order to prevent arbitrary judgment by the Board of Directors and to ensure the fairness and objectivity of the operation of the Response Policies. The Board of Directors will make decisions regarding the Response Policies with the fullest respect for the opinions and recommendations of the Independent Committee.

The effective period of the Response Policies will, in principle, continue until the conclusion of the first meeting of the Board of Directors held after the Company’s annual general meeting of shareholders scheduled to be held by the end of July 2027.

For further details of the Response Policies and the Basic Policies Regarding the Control of the Company, please refer to the Company’s announcement dated August 25, 2026, entitled “Notice on the Introduction of the Response Policies against Large-Scale Acquisition Activities Targeting Company Shares (Response Policies regarding Acquisitions) in Light of the Share Buying-up by Oasis of the Company Shares.”
