Consolidated Statement of Profit and Loss

- Net sales grew YoY due to solid increase in orders in all four categories: mobility, business and industrial, enterprise, and security.
- Operating profit and ordinary profit both grew, surpassing the plan, as investments for future growth (approx. ¥300 million)
 and higher procurement costs were absorbed by profit growth resulting from increased net sales.
- Record-high net sales and operating profit for Q1

Consolidated P&L Trends

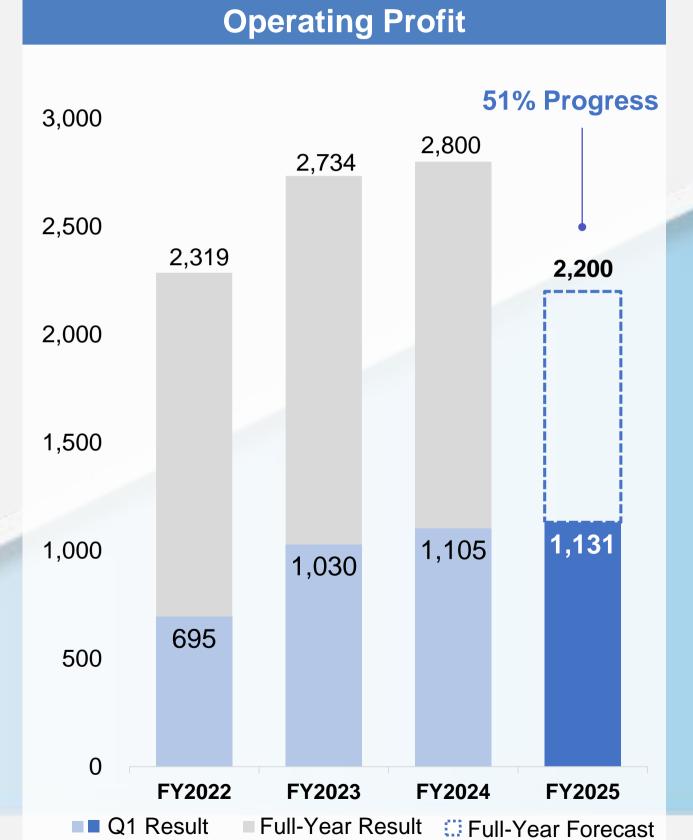

(Millions of yen)

Firm increase in orders in the first quarter, exceeding the plan.

Record-high net sales and operating profit.

Sales by Business Category

Mobility Business and Industrial

- With continued decline in sales related to mobile devices and 5G, shifting toward other embedded systems. Gradual sales growth in automotive systems since the previous fiscal year due to firm performance.
- Aim for further growth in automotive systems, expanding in automotive electronics in addition to instrument cluster systems

• Inquiries on digital transformation-related business systems remain strong.

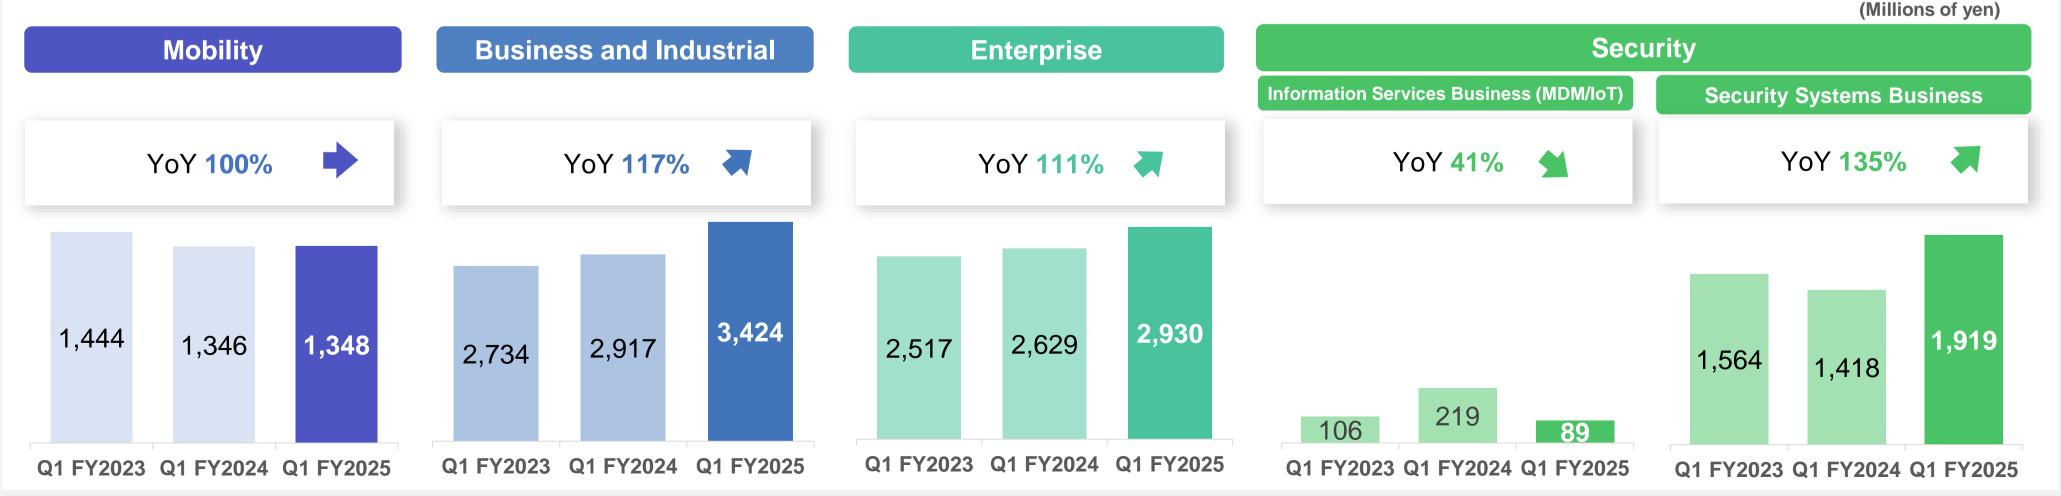

- Received orders including security, medical, education, and IoT-related projects. Embedded systems also remained firm.
- Strong orders from the financial sector, especially from major customers. Continued increase in orders from banks and insurance companies.
- Drove growth in local government projects. Stable performance in IT infrastructure with firm inquiries.

Information services business (MDM/IoT): Sales declined in comparison to significant contributions from hardware sales and IoT projects in the previous fiscal year. Actively proposed solutions and drove MDM growth.

<u>Security systems business</u>: Sales grew significantly due to demand for property renovations stimulated by facial recognition and other devices, as well as the bringing forward of some projects scheduled for Q2. Continued steady growth of the recurring revenue business.
