Operating income and EBITDA have been set as indicators of profitability, and the Company is focused on their improvement. Target values for the operating income margin and the EBITDA margin have also been set, and efforts are being put into the efficient generation of profit. As for shareholder returns, the Company's basic policy is to aim for a dividend payout ratio of 50% or more and a total return ratio of 70% or more.

In its M&A activities, the Company evaluates target companies using approaches and indicators according to their characteristics and judges whether to acquire them based on a comprehensive consideration of factors such as the impact of amortization of goodwill and profitability of the investment. In addition, the Company makes it a rule to hold shares of other listed companies only if the ROE (5 year average) of the investee company is higher than the Company's cost of capital, and it verifies whether individual stocks satisfy this condition every year.

The Company also sees the improvement of its stock price as an important management issue. By promoting constructive dialogue with shareholders and investors and making substantial shareholder returns, the Company endeavors to gain a fair market valuation. As a result of these initiatives, our PBR was 2.82 x in the fiscal year ended March 31, 2026.

Policy and details of director remuneration

The remuneration of The Company's directors is calculated based on the roles and responsibilities of each position, while also emphasizing links with performance in order to strengthen the incentive for enhancing the Company's performance. Therefore, director remuneration consists of base remuneration as fixed remuneration, bonuses as short-term incentive-based remuneration, and stock remuneration as medium- to long-term incentive-based remuneration. The ratio of incentive-based remuneration to the total remuneration of each individual director is at least 40%.

However, outside directors, who occupy a position of independence from business execution and who are responsible for the supervision of management, only receive base remuneration, which is fixed remuneration, because incentive based remuneration is not suited to their role.

<Base remuneration>

Base remuneration is paid monthly as fixed remuneration for the performance of duties.

It is paid according to the base remuneration table following the roles and responsibilities of each position.

<Bonus>

Bonuses are paid annually as short-term incentive-based remuneration for achieving the business plan for each fiscal year.

They are calculated by reflecting the performance and qualitative evaluation results in the standard bonus amount prescribed by position following the bonus calculation standards.

Performance evaluations use net sales, operating income, ordinary income, and net income (consolidated basis) as financial indicators for appropriately reflecting performance in each year under evaluation. The ratio calculated based on the rate of achievement of these targets is used as an evaluation indicator. Qualitative evaluations consider the directors' roles, implementation of responsibilities, and their activities for the year under evaluation that cannot be assessed using financial indicators.

<Stock remuneration>

Stock remuneration provides an incentive for continuously enhancing the Company's corporate value and promotes shared value between directors and shareholders. It is comprised of restricted shares issued annually per the following conditions, as medium- to long-term incentive based remuneration.

(Transfer restriction period and lifting of restrictions)

The transfer restriction period is from the day the shares are issued until the day that the Company's officer retires from any position of director, executive officer, or the equivalent ("Officer"). The transfer restriction is lifted upon the expiration of the transfer restriction period, provided that the Officer has remained in the position of an Officer throughout the transfer restriction period.

(Acquisition Without Consideration)

In case an Officer resigns or retires from the position of Officer without justifiable reason or commits an act that significantly damages the social credibility of the Company during the transfer restriction period, the Company will acquire all of the restricted shares without consideration.

Provided, however, that in case an Officer resigns or retires from the position of Officer due to death or other reasons deemed legitimate by the Board of Directors, the timing and number of shares for which to lift the transfer restriction will be reasonably adjusted.

The number of shares to be issued is calculated based on the stock remuneration threshold amount determined according to position held and the closing price of the Company's common stock on the business day preceding the resolution of the Board of Directors regarding the allocation of shares.

Provided, however, that the total number of shares to be issued to directors shall be 40,000 shares or less per year. In case of a stock split or consolidation that requires adjustment of the total number of shares, the total number will be reasonably adjusted.

Procedures for approving director remuneration

The details and procedures for approving director remuneration are stipulated in the Policy on Remuneration for Directors and Executive Officers. This policy is determined by the Board of Directors based upon deliberations held at meetings of the Governance Committee.

The Governance Committee, entrusted by the Board of Directors, approves the basic remuneration table, bonus calculation standards and standard bonus amount, and stock remuneration threshold amount based on this policy.

With regard to bonuses, executive directors conduct performance and qualitative evaluations of those eligible for payment through consultation, and formulate a plan for the amount of bonuses for each individual.
